

References / Further Reading

Module 12.2 of the following reference provides a nice introduction to parallel algorithms, while 13.2 gets into using matrices as discussed in this module:

Angela B. Shiflet and George W. Shiflet. 2014. Introduction to Computational Science: Modeling and Simulation for the Sciences (Second Edition) (2nd. ed.). Princeton University Press, USA.

The following textbook is a great introduction to basic parallel programming, and includes implementations to all of the examples discussed in this module:

Peter Pacheco. 2011. An Introduction to Parallel Programming (1st. ed.). Morgan Kaufmann Publishers Inc., San Francisco, CA, USA.
